

PROTECT YOURSELF AGAINST MOSQUITOES: TIPS FROM CAMDEN COUNTY MOSQUITO COMMISSION

PRESENTED BY THE CAMDEN COUNTY BOARD OF FREEHOLDERS

You are the first line of defense against mosquitoes in your yard. This summer's rainy weather has produced a bumper crop of them. Camden County's Mosquito Commission does spraying on public roads throughout the County during the breeding season to knock down adult mosquito populations, several factors are taken into consideration in determining where to spray and when. In addition, inspectors are on the job every day to lessen the occurrence of mosquito breeding. But the frontline to mosquito control is you. Here are some tips from the Commission on how to fight the battle of the Buzz and make sure your property doesn't become a breeding ground for mosquitoes.

Tips:

- Mosquitoes need stagnant water to breed. Check your property regularly for anything that holds water for more than a few days. These include among other items, trash cans/lids, flower pots, bird baths, buckets, tires, rain gutters, kids toys, swing sets, kiddie pools, and even bottle caps.
- Dispose of any unnecessary containers that hold water and empty remaining items after each rain event or at least twice a week. If possible, store remaining containers indoors.
- Check folds in pool covers and tarps that can trap rainwater and become a breeding site.
- Store boats upside down so they drain. If covered, keep the tarp tight so water doesn't pool on top.
- Check for items under bushes, in tall grass, and other areas that are shaded.
- Check downspout extensions. If ribbed, or at an angle that allows rainwater to pool inside the extension, this creates a perfect habitat for mosquitoes to breed.
- Change water in bird baths, fountains, and animal troughs weekly. Stock fish or add mosquito larvicide to ornamental ponds.
- Maintain backyard pools. Poorly maintained pools can become a mosquito breeding ground within days after you stop adding chlorine or some other disinfectant.
- Buy mosquito repellent to spray yourself and family members when going outdoors.
- Maintain screens on doors and windows to keep mosquitoes from entering your home.
- Consider hiring a private contractor to spray if you're planning an outdoor event.
