

MT. EPHRAIM AVENUE (CR 605)

Roadway Safety Improvement Study

FACTSHEET • 2017

PROJECT GOAL

The goal of the study is to recommend preferred alternatives that will significantly improve the safety for all modes of travel within the project's study area, with special attention given to vulnerable users: pedestrians and bicyclists. Funding for this project was made available through Delaware Valley Regional Planning Commission's (DVRPC) FY 2016 Local Capital Project Delivery (LCPD) Program for Camden County. This study will comply with the Federal Highway Administration's Highway Safety Improvement Program (HSIP), from which one of the project deliverables will include a Highway Safety Manual (HSM) analysis completed to the specifications of NJDOT's Bureau of Transportation Data and Safety.

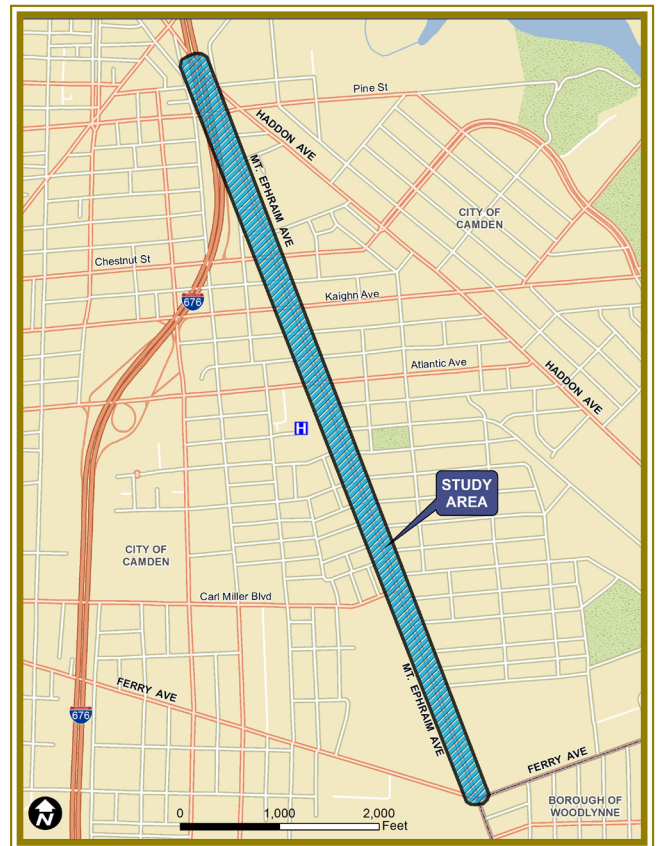

STUDY AREA

Length: 1.43 miles

Boundary: The entire length of Mt. Ephraim Avenue (CR 605) from the intersection of Ferry Avenue (CR 603) north to Haddon Avenue (CR 561) in the City of Camden.

PUBLIC INPUT

A Public Information Center will be held to provide the public with the opportunity to meet with the project team, understand the project, ask questions, and provide input on what problems exist today that could help in developing solutions to improve corridor safety. Meeting information will be added to the webpage as it becomes available.

Study Area Map

PROJECT DURATION

Project Start Date: December 2016

Anticipated End Date: December 2017
