79. Resolution acknowledging personnel actions by or on behalf of constitutional or statutory row offices.

The Director said at this time the meeting is open to any member of the public who wishes to address the Board of Freeholders. He declared the public hearing open.

Bill Warner of Camden County and identified himself as a member of the Cooper River Group of Food and Water Watch. He said I come in tonight to address concerns about hydraulic fracking and the transportation of fracking materials in New Jersey, Camden County and specifically the Pine Barons area. In light of that, he said he has been very encouraged to hear a number of references tonight to environmentalism, sustainability and things of that nature - that has been very encouraging. He said as a teenager, I grew up about 45 minutes from Niagara Falls and the Love Canal area when that situation became public and on my way here tonight, I heard a report concerning the cancers and chemical contamination in Toms River, quite close. He said both of these industrial areas had previously been deemed safe and both involved secrets and information that was kept from the public. He said I am here to expand on the concept of public trust and I am referring specifically to the public trust doctrine described in legal writings and other sources such as the 2006 document produced by the New Jersey Department of Environmental Protection entitled "Public Trust Doctrine to Enhance Public Access". He said admittedly this document concerns tidal and coastal waterways but if the public trust extends to people's access to an enjoyment the waterways, surely the trust extends to the public's access to clean drinking water and the fracking process includes cancerous chemicals like benzene and lead as well as ones we don't know about because these are proprietary trade secrets. In the larger sense of the word, "Trust" in public trust, how can we the public or you as our elected representatives made informed decisions amid secrets. He said as our elected representatives we confer complicit and explicit trust on you to act on our behalf and this is a controversial practice - one that does seem to be shrouded in a veil of proprietary secrecies. I urge you to consider fracking or rather opposition to fracking as a matter of public trust. Public Trust in a legal definition as well as in a larger meaning. He said the public trust can only be supported by your rejection of fracking and practices that enable it. Thank you very much for this opportunity.

Harry Nydick of Collingswood, addressed the Board. Mr. Nydick said I am also a volunteer of Cooper River Food and Water Watch. He said I have prepared nothing. He said I am deeply concerned, however, in many ways, particularly about all the misinformation that has been reported in the newspapers regarding the desire to put a pipeline through the Pinelands. He said Pinelands is one of the largest remaining aquifers in the United States of fresh water. He said it is basically pretty much what we rely on when we add to

it the concern over the processing of fracking waste by plants that cannot process it, it looks like it is more of an economic issue to a limited number of people than it is to the benefit of the public.

He said I personally know, we have a lot of information that tells us for instance about all the fracking waste that has been transported to New Jersey from 2010 to 2012, sent to three plants that are incapable of properly processing it and some of that waste, that my friend here neglected to mention, is actually radioactive as well. He said I don't want radioactive and carcinogenic waters to be put into landfills which is what is happening and which is ultimately going to find their way to the Delaware River, which means we are going to be drinking it. He said I am asking for the support of everybody here. Thanks!

Anne Carroll of Collingswood, addressed the Board. Ms. Carroll thanked the Freeholders to allow her time to address them.

She said in particular, thank you Freeholder Nash for helping get approved Gateway Park. This is something we have been waiting for a long, long time. Last year on the bird walk we saw more than 50 species of birds there and this is an incredible benefit to all of us in Camden County and elsewhere. She said I too am really alarmed about fracking, the transportation of fracking waste and fracking natural gas through the State of New Jersey, the storage and care and the proposed building of a pipeline through our precious Pine Barons. She said fracking once it gets into the water, is going to kill us quicker than global warming. It is the most frightening environmental hazard facing us today. She said I am not sure the public is fully aware of it. The gas industry is the most lucrative industry in the country right now. She said we are actually providing access to ship our natural gas overseas. We do not need liquid natural gas in this country, we have an excess of it, and we are shipping it already to Europe from this Coast and to Asia from the Pacific Coast. She said we urge you please be aware of fracking - do not let it contaminate our State at the very least. Many other States are done with at this point but at least in New Jersey there is nothing to be fracked but we can and are transporting fracked gas through the State and if it goes through the Pine Barons, guys, we are sunk! Thank you and thank you again, Freeholder Nash, for the Gateway Park. We are so happy about that.

Carol Thomas of Collingswood addressed the Board. Ms. Thomas said I am concerned, we live right across from Newton Lake and I can walk out in the daytime and there are a lot of mosquitos around. She said I don't know what to do about. She said I spray around the doorway.

Frank Moran said we will have the Mosquito Commission to reach out to Jack Sworaski to come out to that area to spray.

Chris Johnson of Collingswood addressed the Freeholders. She said she too is concerned about the mosquitos in that area. She got a bacterial infection last summer from a mosquito bite. I know environmental people don't want you to spray but it is dangerous for humans to be infected by mosquito bites. Please find a way to control them. Thank you.

Tim O'Neill of Collingswood addressed the Freeholders and said there is no gas shortage there is no need to build a pipeline but if they are going to build one down by the shore there is an alternative route, which is one reason why the Pinelands Commission voted against it but now we have lobbyists and politicians getting into the act and trying to overrule the Pinelands Commission for just doing their job - just looking after the Pinelands Commission.

He said maybe a suggestion would be for the Freeholders to issue a resolution reinforcing the Pinelands' decision that would be a big help. He said in light of this Board's past environmental history, it wouldn't hurt reinforcing the Pinelands decision. He said if you can do that, it would be a great help. He said I am just one

guy who is just asking. He said his other issue is I am a retired public employee. He said the Governor in his State of the Union said, he was going to pay in full the State's payment to the Pension Fund. Mr. O'Neill said things haven't changed in Trenton.

He refigured the payment formula so he didn't have to pay as much. Every public employee here now a lot of the money is going to get pushed back - the same story as before and will create a problem in the future and the pension system is not going to be solvent. The ramifications are public employees are going to get blamed for something else we didn't cause again. He said the pension is not going to be solvent - I am not as a retiree going to get a cost of living raise or any future retiree. He said I probably won't get one for 30 years if I live that long. He said I am asking you to maybe issue a resolution on behalf of Camden County employees retirees active and retired members of the Pension System admonishing the Governor for his creative financing for violating the terms of his own Health & Pension Reform Law and demanding that he make full payment to said pension system in accordance with his Law. Thank you.

Kathy E. of Collingswood addressed the Freeholders. Kathy said I like to be outside taking care of my neighborhood but after being attacked now I feel vulnerable and not able to just step out without pepper spray. She said I am sure it is not just Collingswood, I am sure it is all throughout Camden that people have dogs that they are not responsible for - don't take care of them - don't care whether they attack people and have no recourse once they do attack. She said I don't know what the answer is. The Director said we are going to contact you tomorrow with hopefully with some help. He said it is a problem throughout the County. He said stray animals are one of our biggest problems. It is something that we can't build something that is big enough. She said it is someone's pet who attacked me. She said even if they are on leashes, and you are out walking, you don't know how far they are going to go on their leash. The Director said we will put you in touch with the proper person in Collingswood tomorrow.

Eulisis Delgado of Camden addressed the Freeholders. Mr. Delgado said I am here today on behalf of Camden - it is time you start sharing services through our Metro Police Department. He said they are doing a fantastic job in the City of Camden. He said they just caught someone who tried to kidnap one of our students from school. He said we have been fighting to get our lights and we are getting our lights now. He said this reporter coming from Washington, D.C. and it is called "The Governor" and they are coming back on Monday and they just called me and said they want to spend some time with us and talk about our great Metro Police Department. He said they just locked up one of our biggest drug dealers up in East Camden on 34th Street - had a lab making cocaine and all kinds of stuff and they are locking them up. He said what I want is for the Freeholders to preach start sharing services. This is going to save the County taxpayers millions of dollars in benefits. He said you are not going to lose your police department - all you are going to do is change the name - Camden County is going to be responsible - you are not going to lose your police department, you are going to keep your own officers - the only thing you are going to change is the Chief of Police and that is it. He said you will have full control of your police department with partnership with the County. That is what I want - I want you to be in contact with the Governor's Office - they will have a meeting with me to see how we can implement and talk about this throughout the County or 37 municipalities. How can we meet with all the Mayors and the City Council people to discuss this - how to make it work for us. Have a blessed day.

Kelly Francis of Camden addressed the Freeholders. Mr. Francis said to quote Arnold Schwarzenegger, I'm back!! He said

you recall I was here last year when I read about the proposed Waterfront Park in the City of Camden between McAndrews and Forbes and the CCMUA. He said I stated my objections last year about that proposed park and why it should not happen and why it would be detrimental to the interest of the City of Camden and I am here to restate that. Mr. Francis said I think that should be abandoned, it should not happen, as you know, you read about it a thousand times - the City of Camden is the poorest City in the United States of America. The reason it is a poor City is because it does not have a sufficient tax ratable to support itself. Now, as we speak, at least 60 percent of the land and property in the City of Camden is tax exempt. The reasons are it is State owned land, County owned land or hospital, churches Institutions colleges - over 60 percent of land in Camden is tax exempt that is why it is the poorest City because it cannot support itself. He said now CCMUA a couple of years ago I read about it that they purchased 5 acres on the riverfront between McAndrews and Forbes and the sewer plant. He said previously it was a factory that employed many people but it was paying taxes in the City and they abandoned it. He said I believe one of the reasons they abandoned it was because they could no longer tolerate the stench from the sewer plant. He said who would want to work all day long and have to smell the sewer plant. He said they eventually abandoned the property and it has been vacant for a number of years. He said in any event that is an industrial area. The Master Plan in the City of Camden has zoned that industrial which is the proper use for it because that is what it was and that is what it's always been and that is the appropriate use for that land. It is right on the waterfront to import and of course I imagine it is contaminated from the previous use but if that is the case, then whoever contaminated it should be tracked down and made responsible for the cleanup and that land should be returned back to the City of Camden so that the City of Camden can derive some tax revenue from it, so it can eventually elevate itself out of the deficit. He said as we speak this year, Camden has a \$15 million deficit, if it doesn't get \$15 million from the State of New Jersey then there will be more layoffs, there will be more cut in services. He said they can't fix potholes in the City of Camden. He said they don't have a capital budget in the City of Camden. He said there is no way that we can afford to give up any more of our industrial or most valuable land. The CCMUA already occupies 46 acres with the addition of the other 5 - 51 acres of prime waterfront real estate, which is tax exempt. He said City of Camden gets not one nickel in revenue from the 51 acres that are now owned by the CCMUA. He said the County occupies at least 100 acres of our prime waterfront land. CCMUA, the Marina, Battleship Museum. All of that is a total of 100 acres that the County already occupies tax exempt. He said you couple that with what the State owns South Jersey Port, the Aquarium, the stadium, that is over 400 acres. There are only three private businesses on the Camden Waterfront that pay full taxes to the City of Camden. He said it is the dredging company in North Camden, FW Winters Company, and McAndrews & Forbes. Mr. Francis said that is the only tax revenue that Camden derives from our entire waterfront - 3 mile long Waterfront. He said that is why we are the poorest City in the country and that is why we have a deficit every year and why we have bankruptcies - if we don't get \$15 million from the State this year - that is what we are requesting there is going to be layoffs. We had layoffs in 2011 half the police department, a third of the fire department, 100 civilian employees who had to take one day a week furloughs for six months. Their salaries were cut 20 percent and that is going to happen again. We cannot afford to lose any more of our land, especially the most valuable land probably on the East Coast. Another issue is the pollution in that waterfront south. In 2001, Judge Orlofsky determined that there was environmental racism upon the people in Waterfront South. He said it was determined because of all the pollutants, the incinerator the highway - we don't only get pollution from our own

highway that goes through the heart of Camden, we also get it from 295 which runs about the Philadelphia waterfront, plus all of pollution from South Philly - all of that blows over into Camden. Who gets it first, waterfront south! They have no protection whatsoever. To put a park with children and families and babies will have to be exposed to that - that is unconscionable - it should not happen. We need to rethink that an abandon that idea. Thank you.

The Director said seeing no other members of the public who wishes to comment, the Director said I will entertain a motion to close the public hearing. Deputy Director McDonnell made a motion to close with a second by Freeholder Leonard and all Freeholders present voted aye.

The Director said I will now open the floor to the Freeholders for their comments.

Freeholder Nash thanked the residents of Collingswood for sharing this beautiful community center with us this evening. He thanked Mayor Wright for staying for us having his comments placed on the record with appreciation. Thank you for being her. Freeholder Nash welcomed Mr. Cappelli, Mr. Legend of Collingswood himself for being here. The Freeholder said on Gateway Park the credit really goes to Frank Moran the Director of the Parks Department - the CCMUA and the New Jersey Conservation Foundation for helping make that park available to the residents. He wished everyone a very happy holiday.

Freeholder Leonard thanked the Mayor and Commissioner for hosting us every year, they are very gracious. The Freeholder said every year when we come here, this is the best the sound system sounds all year long. We don't have to yell, you don't have to be real close. That certainly is a pleasure. The Freeholder thanked the Department of Public Works and Parks for all that they are doing with the potholes - now we are done dealing with the winter, now we have to deal with potholes. He said the aggressive program that Director Martello has set forth with road improvements. It was a very rough winter and the County has recognized that and we are going to be very aggressive throughout the summer and early fall - there are a lot of roads that we have to repair. Director Cappelli said commencing this month, Camden County will embark on a program in an effort to raise the awareness in education of heroin and opium use throughout Camden County. This has become a state-wide if not national problem. The number of overdoses this year is already breaking records in Camden County and throughout the State. We have a real problem. We will be kicking off this effort with a media campaign and a summit on May 19th here in Collingswood at the Scottish Rite Auditorium at 5:30 pm. We will have a panel discussion hearing from experts from the medical field, prevention field, law enforcement and we are trying to raise awareness in education. We are trying to link those who need help with those who can provide help. There will be much more announced in the coming days. It is May 19th. The Director thanked all of the employees of Camden County who do a great job day in and day out on behalf of the residents of Camden County.
