The Truth About COVID-19 Vaccines

Myths

The COVID-19 Vaccine will make me sick

I had COVID-19, I do not need to be vaccinated

COVID-19 vaccine will alter my DNA

The COVID-19 vaccine causes infertility

Truths

COVID-19 Vaccines will not give you COVID-19

Directs our immune system to recognize & fight the virus. Symptoms are normal and are signs of building immunity.

You may still benefit from getting vaccinated

Reinfection of the virus is possible.

COVID-19 mRNA does not change your DNA

mRNA only builds protection. Does not get into the nucleus. (where DNA is stored)

There has been no evidence of causing infertility

It is safe for women and for those who want to plan for a family in the near future.
