# The Truth About COVID-19 Vaccines

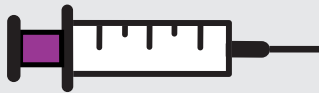

## Myths

The COVID-19 Vaccine will make me sick

I had COVID-19, I do not need to be vaccinated

COVID-19 vaccine will alter my DNA

The COVID-19 vaccine causes infertility

## Truths

COVID-19 Vaccines will not give you COVID-19

Directs our immune system to recognize & fight the virus. Symptoms are normal and are signs of building immunity.

You may still benefit from getting vaccinated

Reinfection of the virus is possible.

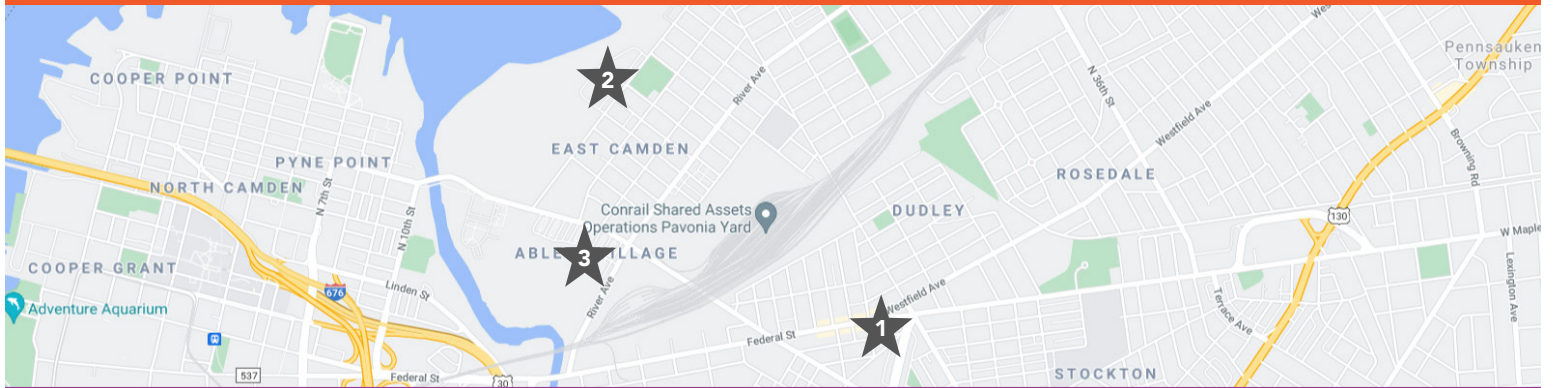

COVID-19 mRNA does not change your DNA

mRNA only builds protection. Does not get into the nucleus. (where DNA is stored)

There has been no evidence of causing infertility

It is safe for women and for those who want to plan for a family in the near future.

# La verdad sobre la vacuna COVID-19

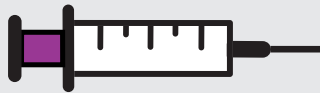

## Mitos

La vacuna contra el COVID-19 me pondrá enfermo

Ya tuve COVID-19, no necesito la vacuna

La vacuna contra el COVID-19 modificará mi ADN

La vacuna contra el COVID-19 provoca infertilidad

## Verdades

Las vacunas contra el COVID-19 no le contagian con COVID-19

La vacuna enseña a nuestro sistema inmune a reconocer y luchar contra el virus. Los síntomas son normales y son una señal de desarrollo de inmunidad.

Todavía puede obtener los beneficios de la vacuna

Aunque haya sido contagiado anteriormente, usted puede volver a contagiarse.

El ARNm del COVID-19 no modifica su ADN

ARNm solo contribuye a desarrollar una protección. No accede al núcleo (donde está el ADN).

No existe evidencia alguna relacionada con infertilidad

La vacuna es segura para mujeres y para aquellos que planean construir un proyecto de familia.
