## **! NOTICE OF ROAD CLOSURE DURING DEMOLITION! BROADWAY: BETWEEN FEDERAL STREET AND MARKET STREET**

The Camden County Improvement Authority (CCIA) is continuing with the demolition of the former Camden County administration building located next to Camden City Hall on the corner of Market Street and Broadway. The contractor continues to make significant progress on the current phase of the demolition process and it is anticipated that the demolition and site cleanup will be completed by June 30, 2024.

As the demolition of the building continues to progress, Camden County and the CCIA will be advancing additional public safety measures around the demolition site as well as provide for new pedestrian access.

To accommodate these necessary changes, the CCIA and its contractor will be closing **Broadway between Federal Street and Market Street** to provide for the additional safety measures and provide for enhanced pedestrian access and walkways.

**On or about October 30, 2023, Broadway between Federal Street and Market Street will be closed to vehicular traffic and new pedestrian walkways.**

It is anticipated that closure of Broadway between Federal and Market Streets will be in place for the remainder of the building demolition and site cleanup.

The revisions around the demolition site will include the closure of Broadway between Federal and Market Streets, as well as the addition of new pedestrian safety walkways and pedestrian safety access points to help with the movement of pedestrian movements around the project site.

Please see the attached map as a reference to the revisions that will be implemented during the week of October 30, 2023. For any questions on the demolition, visit the CCIA project web page at <https://www.camdencounty.com/600market>
