## **WHAT IS A REVALUATION?**

A revaluation is a program undertaken by a municipality to appraise all real property within the taxing district according to its full and fair value.

## **WHAT IS MEANT BY FULL AND FAIR VALUE?**

Full and fair value is the price at which the tax assessor believes a property would sell at a fair and bona fide sale by a private contract on October 1 of the pretax year. The sale must be between a willing buyer and a willing seller. For example, the buyer is not obligated to buy, and the seller is not obligated to sell.

## **WHY IS THERE A NEED FOR A REVALUATION?**

A revaluation program seeks to spread the tax burden equitably within a municipality. Real property must be assessed at the same standard of value to ensure that every property owner is paying his or her fair share of the property tax. For example, two properties having essentially the same market value should be paying the same amount in property taxes. Inequitable assessments result from the following situations:

- Changes in characteristics in areas or neighborhoods within the municipality and within individual properties;
- Changes in zoning which can either enhance or adversely effect value;
- Fluctuations in the economy (inflation, recession);

- Delays in processing building permits, which delay tax assessments on new construction.

## **WHAT HAS TO BE DONE DURING A REVALUATION PROGRAM?**

Both the interior and exterior of each property are usually physically inspected, and building dimensions are noted during the revaluation process. Recent sales of properties are studied and may be adjusted to estimate the value of property that has not been sold. Property typically purchased for investment purposes is analyzed in terms of its income-producing capability. All information believed to have an influence on value will be gathered, reviewed and analyzed in order to make a proper determination of each property's full and fair value.

## **WILL A REVALUATION INCREASE TAXES?**

Although revaluation will result in an increase of nearly each individual assessment, it does not mean that all property taxes will increase. Assessments are merely a base used to apportion the tax burden. The tax burden is the amount that your municipality must raise for the operation of county and local government and support of the school system.

To illustrate, assume the amount a municipality must raise from property taxes is \$10 million. The total of all assessments in the municipality is \$200 million. A municipality would have a tax rate of \$5 for each hundred dollars of assessed value.

$$\begin{array}{l} \text{Amount to be raised from property taxes} \div \\ \text{Total of assessments} \end{array} = \text{Tax Rate}$$

$$\begin{array}{l} \$10 \text{ Million} \div \$200 \text{ Million} = .05 \text{ or } \$5 \text{ per hundred} \\ \text{dollars of assessed value} \end{array}$$

If the \$200 million total of all assessments, as noted above, represents 50 percent of the true value of all real property in the municipality, property owners assessed above this level would be paying an unfair share of the tax burden.

For example a property with a true value of \$80,000 and an assessment of \$48,000 would have its taxes calculated as follows:

$$\begin{array}{l} \text{Assessed Value} \times \text{Tax Rate} = \text{Taxes} \\ \$48,000 \times .0500 = \$2,400 \end{array}$$

The property in the example is over-assessed although the assessment is \$32,000 less than the property's true value. The ratio of aggregate assessments to the aggregate true value of all real property in the municipality is 50 percent. The ratio of our individual property is 60%. (\$48,000 ÷ \$80,000).

Assume that in this same tax year a revaluation was put into effect and the aggregate assessed value is now \$400 million. Although the ratable base (aggregate assessments) would have doubled, the revaluation

would not have meant an increase in total taxes to be collected by the municipality since the tax rate would have declined proportionately, as is illustrated by the calculation that follows.

$$\begin{array}{l} \text{Amount to be raised from property taxes} \div \\ \text{Total of Assessments} \end{array} = \text{Tax Rate}$$

$$\begin{array}{l} \$10 \text{ Million} \div \$400 \text{ Million} = .025 \text{ or } \$2.50 \text{ per hundred} \\ \text{dollars of assess value} \end{array}$$

Applying the \$2.50 tax rate to our property, which would now be assessed at its true value of \$80,000, would mean a decrease in taxes as a result of all assessments based on the true value standard.

$$\begin{array}{l} \text{True Value Assessment} \times \text{Tax Rate} = \text{Taxes} \\ \$80,000 \times .0250 = \$2,000 \end{array}$$

True value assessments, the goal of a revaluation program, would have decreased the taxes for the property owner in our example by \$400. This is based on assumptions within the same tax year. An actual tax rate, however, cannot be determined with any certainty until the new assessments are filed and operating costs for schools, county and local government are fixed. (Budgets are not completed until several months after the date for filing a tax list.) Although a tax rate cannot be calculated until budget requirements are determined, one thing is certain regarding the taxpayer in our example. He will continue to pay more than his fair share of the property tax burden if a revaluation is not undertaken.

Generally, taxpayers of the most severely under-assessed properties before a revaluation will pay a greater share of the tax burden after a revaluation. This means that

their property taxes will increase even if operating costs remain the same. Likewise, taxpayers of the least undervalued properties will pay a smaller share of the tax burden after the revaluation. This means their property taxes will decrease if the total amount to be raised from taxes remains the same.

### WHAT IS EXPECTED OF PROPERTY OWNERS?

A prospective buyer would not be expected to purchase a property without first making a careful inspection. Similarly, an individual ordering an appraisal expects that a thorough inspection will be made before a market value estimate of the property is rendered.

Equitable revaluation depends on the cooperation of taxpayers. Property owners have a stake in the outcome of the revaluation program.

Interior inspections, especially, require that residents cooperate with the property listers. The validity of the market value estimated depends on the collection of accurate data. Any assistance a taxpayer can provide will aid greatly in the total data collection process. The municipality and the company assisting in the program will make every effort to cause taxpayers the least possible inconvenience.

Remember, the people making the inspections are not necessarily responsible for developing the market value estimate. Their job at the time an inspection is being made is not to make an instant judgment as to valuation, but rather to collect pertinent information to be used in the valuation process.

### WILL TAXPAYERS BE INFORMED OF THEIR PROPOSED ASSESSMENTS?

The revaluation firm is required to mail each taxpayer a notice advising him/her of the new appraised value.

### WHAT IF A TAXPAYER IS DISSATISFIED WITH THE PROPOSED ASSESSMENT?

The notice that includes the appraised value will also explain how to arrange for a personal informal hearing to review the proposed assessment. A taxpayer planning to attend the review should be prepared to support any disagreement regarding the appraised value of his property. For example, recent sales of similar or comparable properties are an indication of value. A recent purchase price of the property may also help to support a view as to value. Also, the cost of recently constructed comparable buildings could support a belief of fair market value.

### WHAT CAN A TAXPAYER DO IF HE IS UNSUCCESSFUL IN HAVING THE VALUATION OF HIS PROPERTY REVISED AS A RESULT OF ATTENDING THE INFORMAL HEARING?

The tax assessor will file the new tax list with the County Board of Taxation on January 10 of the tax year. If the matter of valuation is not resolved prior to filing and certification of the tax list, an appeal may be filed with the County Board of Taxation on or before April 1st of the tax year. If the taxpayer is not satisfied by the decision of the County Board of Taxation, an appeal may be filed within 45 days to the New Jersey State Court.
